

**Buglo**

# Trampolines 2.0

NEW PRODUCTS 2024

## Advantages for physical development

Sensory  
Integration

Jumping

Great exercise for motor control

Jumping on trampolines strengthens muscles, improves balance and coordination.

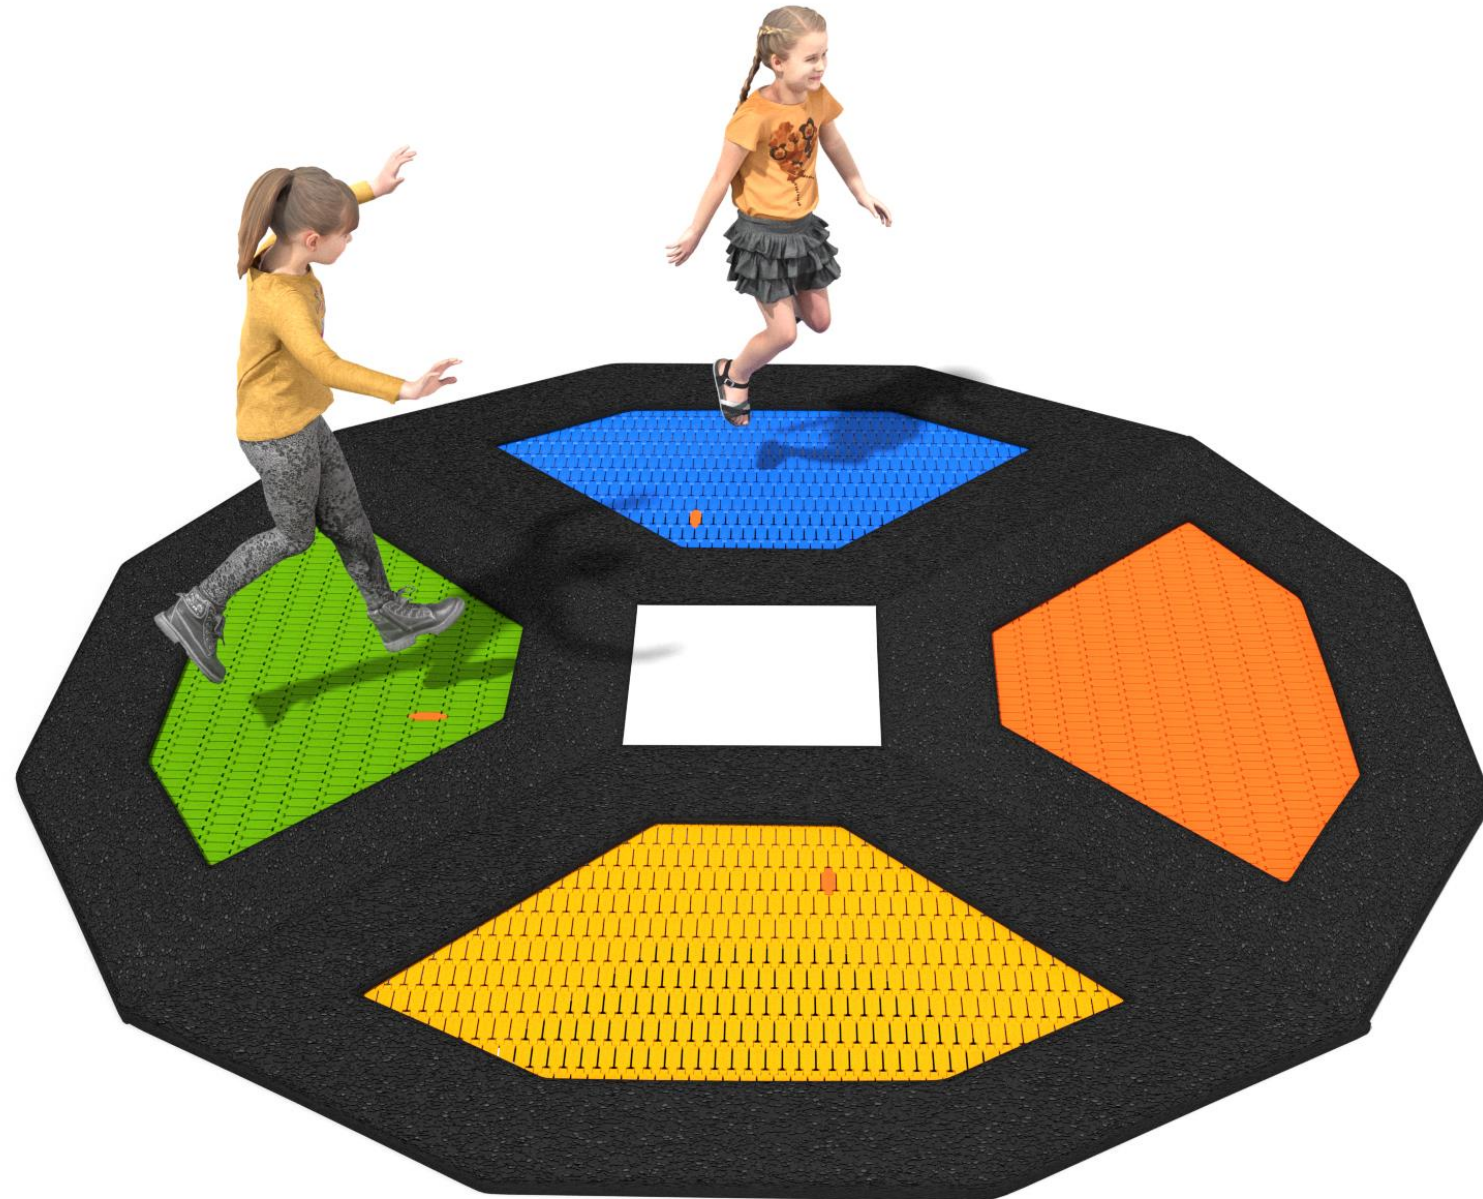

While jumping on trampolines every part of the body is being activated.

Trampoline gives a lot of sensory feelings by stimulating our visual system and proprioception (deep sensation)

# Operational Characteristics

Manufacturing  
time – **standard**

## What is new?

New Trampoline slats 2.0

Improved construction

New rubber mats (SBR/EPDM)

Rubber mats in colour: always black with possibility of colourful grains

Jumping mat suspended to the construction on handles 5 mm thick

168 mm Hot dip galvanised springs, made of 3,2 mm rods

## Characteristics

30 cm wide SBR (black) /EPDM (colour) sides 30 mm thick- cut out of a pressed sheet – not poured

Construction made of 2 mm metal sheet hot dip galvanised strengthened by brackets welded 35-45 cm apart

# Characteristics of Jumpig Mat

**Approx. 3mm gaps between the slats!**

Anti slip structure on the jumping area

Smaller gaps - Better protection against dirtiness in the trampoline

Jumping slats available in 8 colours

Trampoline slats threaded on a 5 mm stainless steel cord in PVC jacket.
